STATE CLEARINGHOUSE

Revised 2011

Description of Nature, Purpose, and Beneficiaries of Project:

The Air District adopted a revision to the State Implementation Plan (SIP) that demonstrates the District rules meet Reasonably Available Control Technology (RACT). The SIP revision includes commitments to adopt two new rules that will apply to VOC emission from plastic parts coating and NOx emissions from natural gas-fired ovens at major sources. Two stationary sources will be subject to the new rules, and both already meet RACT emission standards

No source will be required to change its operations to comply with the new rules; therefore, no adverse environmental impacts will occur.

Reasons why project is exempt:

The adoption of this RACT SIP is exempt from the California Environmental Quality Act (CEQA) as an action by a regulatory agency for the protection of the environment (Class 8 Categorical Exemption, Section 15308, State CEQA Guidelines) and because it can be seen with certainty that there is no possibility that the activity in question may have a significant adverse effect on the environment (Section 15061(b)(3), State CEQA Guidelines).
